MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Total Army Training System Courseware (TATS-C) and Reserve Component Duty Military Occupational Specialty Qualification (RC DMOSQ) in One Year

1. Based on TRADOC RC DMOSQ Task Force recommendations, CG directed all RC DMOSQ training be conducted within a single RC training year, effective 1 Oct 05. To support this initiative, TATS-C proponents will review TATS-C and, as required, redesign and develop TATS-C RC DMOSQ programs of instruction (POIs). Attached are training years 05 TATS-C POIs in ATRRS. The 13E, 13F, 14J, 14S, 25C, 27E, 45K, 51B, 51T, 52C, 62B, 63A, 63M, 91W, 92R, 96B, 97B, and 97E MOS's are of immediate command interest. TRADOC Reg 350-70 will not be an impediment to implementing these changes.
2. The RC DMOSQ institutional training year is now defined as up to 24 days of Inactive Duty Training (IDT) and up to 28 days of Active Duty Training (ADT). The ADT may be split into two 14-day periods within a 13-month window to allow multi-year funding. The combined IDT and ADT will include NCOES common core for a maximum of 52 days. Requests for waiver require Commander, TRADOC approval.
3. The challenge is to redesign and develop single year POIs which maximize the right mix of IDT, ADT, and Advanced Distributed Learning (ADL). ADL may be used in IDT and ADT or as self-paced instruction between phases. Continue to optimize ADT for Skill Level 10 reclassification training. I encourage you to leverage available training developers through the USARC G7 (deborah.conley@usarc-emh2.army.mil) or the NGB-ART (thomas.evans@ngb.army.mil). Wherever possible, maximize use of GWOT funding and in-house Title XIs.
